Dynisco upgrades sensors, transmitters

PLASTICS NEWS REPORT
 Posted November 9, 2011

Dynisco LLC's pressure sensors and smart transmitters now are available with an internal relay switch, marketed under the Guardian Series brand name, that brings them into compliance with machinery safety standards.

The sensors are designed for extruder manufacturers and users that need to comply with the European Machinery Directive standard EN 13849.

In other news, Franklin, Mass.-based Dynisco introduced the 1480 1/8-DIN panel indicator for extrusion equipment. It displays strain-gauge, voltage, current, thermocouple or RTD inputs.

The universal pressure or temperature input indicator can be configured with single or dual alarms for variations in the process and, as an option, linear retransmission of the displayed process reading.

The front panel has three-button operation and includes an easy-to-read display of the process variable and maximum/minimum values.

Tel. 508-541-9528, email joe.diorio@dynisco.com.
