

Dynisco LMI5000 Series

***Limited Time Offer For First 100 Orders ***

**Purchase a Dynisco LMI5000 from now until end of year and
get LaVa Suite Software at no additional cost!**

Polymer manufacturers need to guarantee the quality of their products by testing their materials. Variation in raw material alone or when combined with recycled material can result in premature failures. Confirm the melt flow rate (MFR) of your raw materials when melting plastic before adding to an extruder with the LMI5000 Melt Flow Indexer.

Contact your local rep for more information on the scale

LavaSuite Software Program

Dynisco's LaVa Suite software will record data value points when running your tests and can be reported through various outputs and formats.

Savings of up to \$730.00

Promotion applies to all available LMI Configurations
Reference Promo code **PM18-10** when placing your order.

*All polymers are not the same.... Dynisco's LMI can tell the difference
Can you?*
