Description

The PT4195 Series transmitter is a +/- 0.5% sensor ideal for food or medical applications requiring simple installation, repeatability and reliability. The food grade oil fill material meets FDA requirements 21 CFR 178.3620, 21 CFR 172.878 and 21 CFR 573.680. The PT4195 transmitters provide the industry standard 0 - 5 Vdc amplified signal designed to work with DCS and PLCs. Optional thermocouple or RTD configurations are available to provide melt temperature. The PT4195 features a 1/2-20 UNF thread for simple and easy installation in standard transducer mounting holes.
